

YOUR HEALTH, OUR PRIORITY

At your **PMR Clinic at Johnson Memorial Health**, your health and well being are our top priorities. **So is saving you time and money!**

Did you know we offer many medications for free through the clinic? Our list of prescriptions is updated several times a year so we can try to provide all the medication you might need! If you need a medication that we don't have, the doctor can write a prescription that will be sent to your preferred pharmacy.

The clinic can also do most lab work onsite for free! Instead of paying high prices and driving around town, you have the convenience of getting lab work done in the clinic. PMR updates our list of diagnostic tests often to make sure that the labs you need are available!

We're dedicated to helping you save time and money – so you can live **your happiest, healthiest life!**
